

Informatics Engineering student at Institut Teknologi Sepuluh Nopember with a strong interest in Software Engineering and hands-on experience in full-stack web development and backend systems. Developed REST APIs, integrated databases and services, and deployed containerized applications through academic and real-world projects.

SELECTED PROJECTS

- 01

Customer Portal - PT Semen Indonesia Logistik

DevOps and Fullstack Developer | Capstone project | 2026

Worked across frontend, backend, database, and infrastructure, with a stronger focus on DevOps: deployment and environment configuration with Docker on Linux servers, reverse proxy, debugging, service integration, and CI/CD-oriented workflows. Also developed and integrated REST APIs, authentication, and dynamic frontend features; integrated PostgreSQL, Redis, and object storage.

TECH Go, Gin, Next.js, TypeScript, PostgreSQL, Redis, Docker, Linux, MinIO, Reverse Proxy, CI/CD
- 02

Course Recommendation System

Knowledge-Based System | Academic project

Course recommendations using RAG and LLM components, with transcript handling, curriculum data, vector search, retrieval, and system integration.

TECH RAG, LLM, Python, PostgreSQL, Qdrant
- 03

Hotel Booking Web Application

Full-stack web application

Hotel booking with authentication, role-based access control, admin/user workflows, booking management, and relational database design.

TECH Full-Stack Web, Authentication, RBAC, SQL, Database Design
- 04

Web Application Penetration Testing

Final project | NETICS 2025

Conducted white-box analysis of web application source code to identify common vulnerabilities. Analyzed application security logs and documented findings with impact assessments and mitigation recommendations.

TECH Web Security, White-box Testing, Vulnerability Analysis, Security Log Analysis

Technical range

SOFTWARE ENGINEERING / EDUCATION / RECOGNITION

TECHNICAL SKILLS

Software development	Go, Python, Java, JavaScript, TypeScript, HTML, CSS
Backend	Gin, REST API, PostgreSQL, SQL, Redis
Frontend	Next.js, React, HTML, CSS, JavaScript
DevOps & systems	Docker, Docker Compose, Linux, Git, CI/CD, Reverse Proxy
AI & data	Machine Learning, Data Mining, RAG, LLM, Qdrant
Cybersecurity	Web Application Security, White-box Testing, Vulnerability Analysis, Wazuh

EDUCATION

2023 - Present	Institut Teknologi Sepuluh Nopember Bachelor of Informatics Engineering GPA: 3.50 / 4.00
COURSEWORK	Data Structures, Object-Oriented Programming, Database Systems, Web Programming, Software Design, Operating Systems, Machine Learning, Data Mining

RECOGNITION & CERTIFICATIONS

RECOGNITION	2nd Place - Data Mining Competition, Quadrathlon, Informatics Engineering ITS Best Algorithm Award, Intelligent Computing and Vision Lab Final Project
AWS ACADEMY	Machine Learning, AI Foundations, Data Engineering, Security Foundations
PALO ALTO NETWORKS	CyberOps, Security Foundations
